

NEXUS360: Sales, Profitability & Supply Chain Intelligence

Executive Summary

This report analyzes sales, profitability, regional performance, supplier risks, and supply chain efficiency. The dashboard highlights strong revenue growth across major Saudi cities, stable profitability trends, and opportunities to reduce supplier-related risks and fulfillment delays.

Key Findings

- Total Revenue: 568M
- Total Profit: 215M
- Profit Margin: 37.86%
- Highest Regional Profit Contribution: Khobar
- Accessories and Home Appliances show strong profitability efficiency.
- High-Risk Suppliers represent a significant share of the supplier base.

Business Problems Identified

1. Supplier Risk Concentration – High percentage of suppliers classified as high risk.
2. Lead Time Variability – Fulfillment lead times can impact customer satisfaction.
3. Revenue Dependence – Revenue concentration among a limited set of products.
4. Regional Imbalance – Some cities contribute less profit than leading regions.
5. Inventory & Demand Alignment – Demand concentration requires better forecasting.

Recommended Solutions

1. Diversify supplier portfolio and create supplier scorecards.
2. Implement predictive demand forecasting models.
3. Optimize logistics routes and warehouse allocation.
4. Develop targeted regional sales strategies.
5. Establish automated KPI monitoring and alerts using Power BI.

Strategic Recommendations

- Focus investment on high-margin categories.
- Reduce dependency on high-risk suppliers.
- Improve lead-time performance through supplier collaboration.
- Expand revenue opportunities in underperforming cities.
- Use advanced analytics for forecasting and risk management.
